

FRANCIA - JUNIOR SOFTWARE DEVELOPER (F/M)

1 posto

The Institut Laue-Langevin (ILL), situated in Grenoble, France, and founded by France, Germany and the United Kingdom, is Europe's leading research facility for fundamental research using neutrons. The ILL operates the brightest neutron source in the world, reliably delivering intense neutron beams to 40 unique scientific instruments. Every year, the Institute hosts over 2000 visits by scientists, who come to carry out world-class research in solid-state physics, crystallography, soft matter, biology, chemistry and fundamental physics. The "Projects and Techniques Division", which is responsible for the development of the ILL's instruments and for technical support, currently has a vacancy within the IT Service for a: Junior Software Developer

You will be part of the European project PaNOSC = Photon and Neutron Open Science Cloud. This project brings together six major world-class European research infrastructures to create a fully integrated, pan-European information and analysis infrastructure supporting the scientific process.

Duties:

Your main duties will be to: develop the user interfaces for web applications using the latest web UI technologies and participate in the development of server-side applications with a team of other developers.

Qualifications and experience: (Qualif. post-diploma / ITS)

NVQ Level 4 or equivalent qualification in Computing, specialising in software development, along with professional experience in the following areas:

- JavaScript and the use of frameworks (such as React and Angular)
- Knowledge of APIs and modern tools, such as GIT, build tools, testing frameworks and continuous integration
- Use of the command line
- Systems administration experience (docker, virtualisation etc.) would also be appreciated.
- You have excellent communication skills and are a good team player. You enjoy learning, have a passion for building great user experiences and take pride in a job well done.

Language skills:

As an international research centre, we are particularly keen to ensure that we also attract applicants from outside France. You must have a sound knowledge of English and be willing to learn French (a language course will be paid for by the ILL). Knowledge of German would be an advantage.

Notes: Fixed-term contract (contract end: 1st December 2022).

Benefits: Generous company benefits (expatriation allowance), relocation assistance and language courses may be offered (for more information, please consult our employment conditions).

How to apply: Please submit your application on line, no later than 31.03.2019, via our website: www.ill.eu/careers (vacancy reference: 19/15) and CC_eures@regione.piemonte.it

Scadenza: 31 Mar 2019

FRANCIA - TECHNICIAN IN MECHANICS (F/M)

1 posto

The Institut Laue-Langevin (ILL), situated in Grenoble, France, is Europe's leading research facility for scientific research using neutrons. We welcome over 2000 visits of scientists per year to carry out world-class research.

Are you interested in joining our international institute? We currently have a vacancy for a: Technician in Mechanics.

Duties:

Within the Large Scale Structures Group you will work in close collaboration with the scientists in charge of the "instrument" (experimental station) D17 and the other technicians of the group.

You will carry out the following missions:

Perform maintenance work and undertake the necessary repairs on the instrument and associated equipment;

Assist in-house and visiting scientists with the preparation of their experiments;

Design new equipment in collaboration with ILL scientists and the technical support groups, search for optimum technical solutions;

Perform simple machining of mechanical parts (lathing, milling, drilling) accurately and at short notice;

Install, maintain and operate sample environment equipment, in particular cryostats, furnaces;

Organise the purchase of new equipment and spare parts;

Ensure compliance with the safety regulations, in particular those relating to nuclear safety.

Qualifications and experience: (Qualif. post-diploma / ITS)

You have an NVQ Level 4 or equivalent qualification (e.g. BTEC HNC/HND) in Mechanical Engineering, together with experience in the production, assembly and alignment of precision mechanical assemblies, as well as in mechanical design. You are also able to use CAD software. Experience of scientific instrumentation, in particular in the field of cryogenics, would be an advantage.

This post requires a practical approach, a willingness to learn new techniques, a clear ability to work independently and on a wide variety of projects, as well as the necessary interpersonal skills for working with the visiting scientists.

Language skills:

As an international research centre, we are particularly keen to ensure that we also attract applicants from outside France. You must have a sound knowledge of English and be willing to learn French (a language course will be paid for by the ILL). Knowledge of German would be an advantage.

Notes: This post is a permanent position. Medical fitness for work under ionising radiation is required.

Benefits: Generous company benefits (expatriation allowance), relocation assistance and language courses may be offered (for more information, please consult our employment conditions).

How to apply:

Please submit your application on line, no later than 31.03.2019, via our website:
